SMARTEEVA AUDIT TRAIL

Streamlining Post-Market Surveillance

Effortless Tracking and Compliance

Smarteeva's Audit Trail revolutionizes record tracking with easy-to-interpret, color-coded changes. This feature allows users to quickly understand updates and inserts at a glance, enhancing efficiency and accuracy during audits.

Integrated Data Review

With Smarteeva, effortlessly oversee all related record changes from a single screen. Our platform enables users to acknowledge and verify data changes, ensuring compliance with industry regulations without the usual complexities.

Key Features

Color-Coded Changes
Simplify your audit reviews with visual cues for immediate understanding of record modifications.

Unified Record Viewing
Access changes not only in current records but also in all related records, streamlining your data review process.

Smart Data Decisions
Our intelligent platform facilitates smart, data-driven decisions by offering easy setup and review of meaningful data changes.

Features

Comprehensive Coverage
Smarteeva's Audit Trail covers a wide range of data types and offers unlimited tracking capabilities, ensuring no detail is missed.

User-Friendly Design
Built on the modern Salesforce.com platform, our solution integrates seamlessly with other applications, offering a user-friendly experience that reduces training time.

Benefits

Time and Cost Savings
Reduce the time spent on tedious data research during audits. Our platform is accessible from anywhere, on any device, offering detailed dashboards and reports for a comprehensive view of record states.

Regulatory Adherence
Maximize compliance with industry standards and minimize delays in record review processes.

Cost-Effective Implementation
Enjoy lower upfront costs and predictable spending without the need for costly upgrades or maintenance.

Simple Adoption
Designed for ease, MDREngine facilitates rapid setup and integration into your existing systems.

Discover how Smarteeva's Audit Trail can empower your organization to maintain the highest standards of post-market surveillance with minimal effort and maximum efficiency.
